## **DETAILED ACTION**

### ***Claim Objections***

Claim 35 is objected to because of the following informalities: Claim 35 is missing the term "tetrachloro" after the recitation 4,6,1',6'-. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The terms "majority" and "substantial" in claims 3, 14, 15, 24, 25, 26 and 34 are relative terms which render the claims indefinite. The terms "majority" and "substantial" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-4, 6 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Navia et al (US 5498709).

The applied reference has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Navia et al teach the preparation of sucralose wherein the aqueous alkaline mixture of the crude sucralose (first solvent water) is extracted with toluene (second partially immiscible solvent) to remove impurities. Then a second liquid extraction is performed with 2-butanone (partially immiscible third solvent) which effects the transfer of majority of sucralose into 2-butanone. The sucralose is recovered from the 2-butanone extracts. The extraction performed is also a batch extraction using toluene and 2-butanone (see col. 11, lines 1-13).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 49-54 rejected under 35 U.S.C. 102(b) as being anticipated by Antenucci et al (US 5384311).

Antenucci et al teach sucralose preparations (see examples in columns 3-8). The recitation "obtained by the method of claims 1, 13, 23, 33, 37, and 43" are not given patentable weight. Even though product-by-process claims are limited by and defined by the process,

determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

***Conclusion***

1. Claims 1-4, 6, 11, 14, 15, 24-26, 34 and 49-54 are rejected.
2. Claims 5, 7-10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. Claim 35 is objected to.
4. Claims 13, 16-23, 27-33, and 36-48 are allowable.
